

## Biography

«Seeing the potential in a project either in building or flying and dream what they can become – that's what I love»

Steve Bramfitt

## Living

Born February 1985 in the United Kingdom. Started flying at the age of 22. I love everything around flying, wind and water. Now living and working from Interlaken-Switzerland - this is one of my favourite places to be! Being in the mountains to me feels like a big playground.

All of my other hobbies are generally based around flying, wind and water, at the moment mainly some crystal clear mountain lakes.

I very much enjoy the process of learning new skills, fine tuning them with my own style. Kitesurfing and kite foiling are two of them, combining the wind and water together. Enduro biking is another sport I enjoy, going fast down technical terrain and keeping focus. Being in the feelings of a FLOW state is very similar in all of these sports and is a feeling that I am always happy to find myself in. In the winter I enjoy ski touring, on and off piste skiing as well as speed riding down some of the most beautiful ridges of the Swiss alps or elsewhere.

## Profession

Professional paragliding pilot including tandem/passenger flights, 1on1 coaching, Volbiv training, acro flying and speed flying/riding.

In addition I enjoy a part time job working as a builder focusing on renovation on houses and project development.
